**We have made our proven system even better, for you!**

# Snow-Tuning **with** SnowPlus **for pump stations**

**Your advantage:**

- \* Higher snow quality and better slopes**
- \* 10% improvement in production possible**
- \* Economical and environmentally friendly**
- \* Reduces energy costs**
- \* Advantages in boundary areas**
- \* Longer snow periods**
- \* No additives**

**You're interested and would like to learn more?  
 I am happy to answer your questions and will explain  
 the figures, facts and mode of operation.**

# SnowPlus for pump stations

**\* Simple to use**  
SnowPlus for the pump station is simply fixed to the pipe with Velcro fastener.

**\* Smaller crystals**  
SnowPlus alters the water structure and reduces the surface tension. Water atomizes finer, freezes faster and crystallizes better.

with SnowPlus

without SnowPlus

**\* More snow**  
Snow is significantly drier. Water throughput can be increased by 10 to 20%. Increased production is possible with the same energy and labor costs.

**\* Better slopes**  
The snow is finer and dryer. The slopes are more stable, less slippery and less icy, making them more resistant to skis, sun, warm winds and rain.
